Frage (öffentlich)

How can I update the magnalister plugin (starting with version 3.0.4) in Shopware 5?

Lösung (öffentlich)

Since the new Shopware compliance guidelines are in effect, magnalister plugin updates should only be executed via the Shopware Plugin Manager. We do our best to provide the latest magnalister version in the Shopware Community Store in short, regular time intervals.

You can see in the magnalister plugin if an update is available. For this purpose a note is displayed at the bottom in the middle of the screen next to the current version number (example: "new magnalister version 3.0.6 available"). With a click on the note you are redirected to the Shopware Plugin Manager where you can execute the update.

Please proceed as follows:
- You will see the magnalister window in the Shopware Plugin Manager. Click on "Install Update“.

- The latest magnalister version is now downloaded and installed from the Shopware 5 Community Store

Important notes:
- If you have activated update notifications in Shopware, you will also be informed in the Shopware backend when a new magnalister version is available in the Community Store.

- You can view the changelog for our magnalister Shopware plugin via the Shopware Community Store or directly in the Shopware Plugin Manager. The changes of the latest magnalister Build can be found in your magnalister customer account.

If you do not want to update magnalister via the Shopware Plugin Manager, you can always download the latest version from the magnalister website and upload it via FTP to your server:
